

Hibrahim Onyango

Full-Stack Developer · Systems & Network Engineer

☎ +254 759 483 399 • 📍 Nairobi, Kenya • ✉ onyangohibrahim0@gmail.com

Professional Summary

Full-Stack Developer and Systems Engineer with 4+ years of hands-on experience building web applications, automating workflows, and managing enterprise IT infrastructure. Combines software development with deep infrastructure knowledge, covering Windows Server, Linux, Active Directory, DNS/DHCP, and Cisco networking. Proven track record in freelance and enterprise environments, including supporting 10,000+ users at a national government data center.

Skills & Technologies

Development: Python · JavaScript · Node.js · PHP · C++ · HTML5 · CSS3 · MySQL · REST APIs · Bash · Git & GitHub

Infrastructure: Windows Server · Linux (Ubuntu) · Active Directory (AD DS) · DNS & DHCP · Group Policy (GPOs) · System Monitoring

Networking: Cisco Routing & Switching · LAN/WAN · Network Security · Firewall Concepts · VPN · Network Troubleshooting

Security: Endpoint Security · Access Control · Cybersecurity Fundamentals · Data Protection & Compliance · CCTV & NVR

Tools: VS Code · Postman · VirtualBox · MS Office Suite · CRM Systems · ERP Systems

Learning: Cybersecurity · Cloud Infrastructure · Advanced System Design

Professional Experience

Freelance IT Support Consultant & Developer | *Independent* | 2022 – Present

- Deliver end-to-end IT support and development services for multiple individual and business clients
- Build and deploy custom web solutions, automation scripts, and digital presence systems for clients
- Diagnose and resolve hardware, software, and network issues in Windows and Linux environments
- Design and configure office and home networks including routers, switches, Wi-Fi, and printer connectivity
- Install and configure CCTV and basic security systems for residential and commercial clients
- Maintain client documentation, issue logs, and resolution records to improve recurring support efficiency

ICT Attachment — National Geospatial Data Center (Ardhisasa) | *Konza Silicon Company Limited* | April 2023 – July 2023

- Configured and maintained secure network infrastructure including routers, switches, and end-user devices
- Supported over 10,000 nationwide users by resolving hardware, software, and connectivity issues in a large-scale government ICT environment
- Monitored server logs and system performance to identify and resolve security and operational issues
- Managed backup and restoration procedures to maintain data integrity and business continuity
- Implemented user access controls and supported endpoint security measures across systems
- Supported the national land digitization system through daily ICT operations and technical support

Projects

Home Lab — Network & Systems Administration | *Personal Project* | Ongoing

- Built a virtualized enterprise lab using VirtualBox with Windows Server and Ubuntu Linux
- Configured Active Directory Domain Services (AD DS), DNS, DHCP, Group Policy Objects (GPOs), and role-based access control

- Implemented firewall rules, system hardening, and network segmentation to simulate real-world enterprise environments
- Practiced troubleshooting, user management, and infrastructure monitoring in a controlled lab setup

Portfolio Website — devebrah.github.io/my_portfolio | *Personal Project* | 2025

- Designed and built a full portfolio website from scratch using vanilla HTML, CSS, and JavaScript — no frameworks
- Implemented scroll animations, custom scrollbar effects, contact form with Web3Forms integration and hCaptcha
- Applied SEO best practices including structured data, sitemap, meta tags, and Google Search Console submission
- Deployed on GitHub Pages with custom domain preparation and full mobile responsiveness

Education

Bachelor of Business and Information Technology — 2nd Class Upper Division | *KCA University* | 2020 – 2024

Diploma in Computer Networks & System Administration (DCNSA) | *KASNEB* | 2025

Software Engineering — Backend Specialization | *ALX Africa* | 2023 – 2024

Certifications

- **Network Essentials** — Cisco Networking Academy (2021)
- **Certificate in CCTV Technology** — Brand Institute of Forensics & Security (2025)
- **Data Protection Act Training** — Brand Institute of Forensics & Security (2025)
- **Web Development Certification** — KCA University (2022)
- **AI Starter Kit** — ALX Africa (2025)

Languages

- English — Professional Proficiency
- Kiswahili — Professional Proficiency
